annoncent :

CHROMATOGRAPHIE ELECTROPHORESE SYMPOSIUM INTERNATIONAL IV

628 pages au format de 16 × 24,5 cm, comprenant 282 figures et 66 tableaux. Prix : 780,- FB

Le Symposium IV reflète l'ensemble des conférences et des communications présentées à l'occasion du colloque international de 1966, les 12, 13 et 14 septembre.
Les conférences traitent des sujets suivants :

— Sur quelques progrès récents en chromatographie, par E. LEDERER (France);
— Charakterisierung und Isolierung von Proteinen durch Electrophoresemethoden, par N. HEIMBURGER et H. G. SCHWICK (Allemagne);
— Use of ion exchangers in thin-layer chromatography, par K. RANDERATH (U. S. A.);
— Aspects juridiques de la chromatographie, par G. B. MARINI-BETTOLO (Italie);
— Analyse systématique des stéroïdes par chromatographie sur couche mince, par B. P. LISBOA (Suède).

Aux conférences succèdent les communications présentées dans les différentes sections et qui traitent des sujets les plus variés : chimie biologique et bromatologie (lipides, protides), chimie pharmaceutique (alcaloïdes, vitamines, hypnotiques), antibiotiques, etc. Une abondante bibliographie complète les textes des conférences et des communications illustrées par de nombreux graphiques et clichés et rehausse l'intérêt de l'ouvrage qui constitue une source de documentation de premier ordre sur des questions en pleine évolution.
